Our Approach to Measuring Performance

We will take a balanced approach to measuring performance focusing on three key areas:

1. Strategic Implementation

Are we achieving our strategic aims?

2. Organisational Effectiveness

How well are our operations working?

3. Organisational Efficiency

Are we operating efficiently?

Our strategic themes

Care

- Delivering our services in an environment that is supportive, trauma-informed and non-adversarial where rights are respected and upheld
- Ensuring our staff and Tribunal members are valued and supported

Connect

- Increasing participation and engagement of children and young people in the development of our services and in the decisions made about them
- Nurturing our relationships with children, young people and their families, our partners, the community and the environment recognising that relationships are the agents of change

Collaborate

- Working effectively with our partners to agree protocols and standards to improve outcomes for children and young people and ensure they get the right help at the right time
- Share information and data to inform understanding and raise awareness of the roles of the Tribunal and Convenor and the issues faced by children and young people within our communities

Change

- Continue to develop effective services in imaginative and innovative ways
- Increase our use of technology to enable more connections to take place electronically or by remote means

The Annual Business Plans of the Convenor and President will set out the actions that will be delivered each year to progress these strategic aims. We will review these action plans and our performance against them on a quarterly basis.
